D12 MAX 75/78

Marlow D12 Max 75 and D12 Max 78 are premium lightweight, high strength, low elongation "all round" ropes manufactured using Dyneema® SK75 or SK78, delivering industry leading strength, stiffness, durability and longevity.

D12 Max 75 and 78 have indentical strength and elongation, but in In permanent load situations D12 Max 78 (utilising SK78) exhibits industry leading low creep (permanent elongation from extended time under load), bettered only by Dyneema's own DM20 material.

Manufactured using a 12x1 12-strand construction and colour coated with Marlow's propriatory ArmourCoat, D12 Max undergoes our "Max" special heating and pre-stretching process which takes the Dyneema material to it's limits, but delivers class leading strength and low stretch.

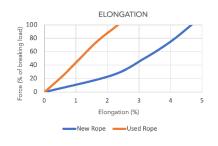

D12 Max 78 is manufactured using Bio based Dyneema® for improved sustainability and a lower impact on the environment.

Very good 140°C

80°C (exposure to temperatures over this will result in permanent strength loss)

Creep is a factor of load, temperature and time. Increasing any of these factors will increase creep.
